

Community Context Basic Problem Mapping Participant Evaluation Results

1. Please circle the most appropriate number:

Participants at the last meeting were asked to rank their experience mapping the basic problems of the community context on a scale of 1-5. The 18 respondents provided the following:	Strongly Disagree		Agree		Strongly Agree
	1	2	3	4	5
This is an important topic for our community. <i>(One participant indicated that this topic was too broad)</i>			4	6	8
Our community is a Safe and Nurturing place for All Children.		4	10	2	2
There is value in looking at community context in relationship to the prevention system.			2	10	6
I felt I was able to speak openly about this topic.			2	5	11
Our community has trust and relationships to work together on this issue.		1	6	7	4
The problem map process respected and enhanced the unique attributes of our community.			10	5	3
Our community is ready to work on this problem.			10	5	3
We were able to talk about what I believe are the root causes of the problem.			6	9	3
There were things that I wanted to say that I did not say that I believe are important.	7	7	2	2	
The meeting was worth my time.			7	4	7

2. It would be good to have additional information about:

- Successful policies, programs, practices in other communities across NE.
- Evidence based practices.
- A contact/participant list for networking and resources available.
- Too broad to develop any depth of understanding; how to get to priority.

3. Any other comments: Please use the back.

- Thanks for sharing!
- Thank you!
- Absolutely valuable, glad I found out about it!
- There are so many different agencies and it is so hard to bring them all together. Like you said earlier, for those that have been doing it for 10 years it's easy, but for me and I'm new to the community I just don't quite understand it and its hard to wrap my brain around it.
